

NIKHIL

AI/ML Full Stack Developer | React.js | Python

8800868912 | nikhilj5prime@gmail.com | Audax Labs Pvt. Ltd. | Noida, Delhi (NCR)

PROFESSIONAL SUMMARY

Dedicated Software Developer with 5 years of experience designing, developing, and maintaining enterprise web applications and AI/ML-powered search solutions. Core expertise in AI, Python, FastAPI, React.js, JavaScript, and MongoDB - delivering scalable frontends and RESTful APIs for clients in Banking, Investigations, and IoT domains. Proven experience building UIs for platforms leveraging advanced AI/ML and search algorithms (DataBeagle, Content Lens). Strong collaborator in Agile environments with a focus on code quality, testing, and production reliability.

CORE TECHNICAL SKILLS

AI/ML & Search

AI/ML-powered search applications, semantic search integration, NLP-based content discovery, search algorithm optimization, intelligent data retrieval, RAG workflow, MCP, LLM training.

Languages / Frontend / Backend / Tools

JavaScript, TypeScript, Python. React.js, Redux, HTML, CSS, MUI, Bootstrap. Python, Django, FastAPI, RESTful APIs, Microservices, MongoDB. Git, Jira, Bitbucket, Jest (unit testing). Algorithm design, debugging, code reviews, Agile/Scrum.

WORK EXPERIENCE

AI, Python, React & JavaScript Developer | Audax Labs Pvt. Ltd.

September 2021 - Present

- Implemented RESTful APIs in React.js for DataBeagle (Hitachi) - an AI/ML-powered search application for banking and investigations - enhancing system performance and scalability.
- Conducted code reviews and maintained code quality across enterprise modules serving clients including HITACHI and RABOBANK.
- Transformed a JavaScript application to TypeScript for Content Lens (Leonardo), an AI/ML-driven content discovery platform, improving performance and security.
- Worked closely with project managers to design and implement new modules incorporating APIs, data manipulation, and diverse functionalities.
- Executed multilingual app translation (English / Spanish) per client specifications.
- Written comprehensive test cases using Jest library across multiple modules.
- Resolved critical production issues through analysis and debugging, minimizing system downtime and enhancing reliability.
- Actively contributed to Agile ceremonies - sprint planning, daily stand-ups, and retrospectives.

PROJECTS

DataBeagle - AI/ML Search Platform (Hitachi)

Enterprise search application for banking and investigations used by HITACHI and RABOBANK. Leverages advanced AI/ML and search algorithms for threat management, cost reduction, and investigation workflows. Built React.js frontend with RESTful API integration for efficient data retrieval and scalable search operations.

Content Lens - AI/ML Content Discovery (Leonardo)

Search application for LEONARDO harnessing advanced AI/ML algorithms for accurate and efficient content discovery. Migrated codebase from JavaScript to TypeScript for enhanced performance and security. Designed and implemented new modules with APIs, data manipulation, and diverse functionalities.

FOTA - Firmware Over-The-Air (Harley-Davidson)

IoT-based application for seamless firmware updates on Harley-Davidson electric bikes using Azure cloud technology and storage. Enables integration of new features and updates, ensuring optimal device performance

and a future-ready user experience.

EDUCATION

Bachelor of Computer Science Engineering

Bengal College of Engineering and Technology, Durgapur, W.B. | 2017 - 2021
